Management Systems

SUMMARY

I'am That kind of person who is a programming enthusiast and loves modern technologies. I would like to be a part of a progressive organization to develop my skills and to contribute my touch for the success of the organization

EXPERIENCE

Robotic Engineer Intern

Inker Robotics Solutions Pvt.Ltd

📅 04/2023 - 05/2023

📍 Thrissur,Kerala

- I gained practical experience in working with cutting edge technologies such as robotic arms, IoT, AI, 3D printing, and VR.
- I programmed and controlled robotic arms,integrated IoT devices, developed AI algorithms, utilized 3D printing for prototyping, and created immersive VR experiences.

PROJECTS

College Management System

📅 2024

Python Django

The College Management System (CMS) is a comprehensive software solution designed to streamline and automate various administrative and academic processes within educational institutions. Developed to meet the specific needs of colleges and universities. CMS offers a centralized platform for managing student information ,faculty data, course schedules, and administrative tasks.

Online Rental Store

📅 2023

Python Django

The online rental system is a platform where a person can offer any kind of gadget for rent over a reasonable price while another person can directly approach him to rent this desirable product. It provide a user friendly interface and to produce a web-based system that allows customers to register and reserve products. The main reason for the bloom of rental material is that you can earn more profit without investment. This application can be used anywhere, anytime.

Prison Management System

📅 2022

PHP Laravel

- The system which helps to decrease difficulties faced by the current system and manage the activities done in prison through online using the modern technology.It is Life long .But sometimes there might be a need for updating the system based on the changes in rules and regulations of Govt.Also the system canbe changed as per need of the admin and users
